

WASP

KEEP MOVING

WITH WASP DOLLIES AND CARTS

There's no reason to just get by with a basic dolly design.

Rollers, casters, center pivots, single or double Ackerman steering, various container and pallet sizes and multiple load capacities — no matter what your operation needs, we'll make sure you have a dolly that fits. Plus, our engineering team will work directly with your safety department to meet any requirements.

We custom design and manufacture to ensure you not only get a product that works for you, but that it fulfills your company's highest expectations for reliability and safety. Then we test it and test it again to make sure it holds up for the long haul.

It's how we keep you moving.

CONTAINER DOLLIES

MOVE CONTAINERS WITH EASE

WASP dollies will easily secure and transport almost any container size as fast as 25 mph (40 kph).

ROLLER • CASTER • TURNTABLE

TOWBAR-ACTUATED BRAKES

RADIUS-CUT CORNERS

GALVANIZED ROLLERS

FULL LINE FEATURES AND BENEFITS

- Integrated dolly and towbar work together seamlessly to prevent jackknifing and damage.
- U.S. military-grade powder coating provides endurance and customization, and optional hot-dip galvanizing further improves durability.
- Heavy-duty E-style and pintle hitches ensure secure connections.
- Heavy-duty steel, 1/4-inch-perimeter frames with radius-cut corners protect the dollies while preventing potential aircraft damage.
- A foot-operated release on Double Ackerman models eases push-off.
- Lead-edge steel rollers on caster dollies eliminate 90 percent of potential damage.

CONTAINER DOLLIES FEATURES AND BENEFITS

- Towbar-actuated brakes easily secure the front wheels on most models. The rear brake dolly offers lever-controlled rear-wheel brakes.
- A variety of containers fit models in the dolly series, including LD-1, LD-2, LD-3, LD-4, LD-8 and LD-11.
- Vertical restraints, manual over-center container locks or automatic ramp-on container locks secure containers in place.
- Sealed bearings minimize maintenance and maximize longevity.
- Options suit any job need, from single to Double Ackerman steering to capacities ranging from 3,500 to 7,000 pounds (1,588 to 3,175 kilograms).
- On the turntable container dollies, flip-up stops secure LD-2 and LD-3 containers on the smaller model while the larger model uses ramp-on stops to facilitate loading LD-3, LD-4 and LD-8 containers. A transfer deck model offers stops that can be handle-actuated from either side.

CARGO DOLLIES

MANEUVER AND TRANSPORT CARGO EFFICIENTLY

Efficiently load, adjust, move and unload cargo on stable, tested, long-lasting dollies and trailers.

ROLLER • CASTER • CARGO TRAILER

CARGO DOLLIES FEATURES AND BENEFITS

- Transport various sizes with ease, including 88-by-125-inch (224-by-318-centimeter) and 96-by-125-inch (244-by-318-centimeter) pallets and containers. The bed-type roller mode also handles LD-3 containers.
- Haul 15,000 pounds (6,804 kilograms) at once on these durable dollies that can be towed as fast as 25 mph (40 kph).
- Choose the loading and towing options to fit your operation, from side or end loading to side or end towing.
- A 20-foot-long cargo trailer model gives additional cargo transport capabilities.

NEW STANDARD DOLLY

MANEUVER AND ADAPT TO CHANGING LOADS

Discover the new standard in cargo/container dollies with a long-lasting, easily adaptable unit.

- Load LD-2, LD-3, LD-4 and LD-11 containers, including two LD-2 or LD-3 containers at a time, to accommodate ever-changing workloads. It also takes on half, 88-by-125-inch (224-by-318-centimeter) and 96-by-125-inch (244-by-318-centimeter) pallets.
- Eight wheels and a heavy-duty steel frame easily handle loads as heavy as 15,000 pounds (6,804 kilograms).
- Tineway pockets allow the load to be easily moved in situations where a loader or transfer place isn't available.
- It's our same high quality at a value price for the absolute lowest total cost of ownership. Plus, they're ready to ship in stacks up to five high with no crating needed and roll-on/roll-off capacity.
