

KEEP MOVING WITH WASP RACKS

Whether it's on a truck or in a building, keep your cargo moving quickly toward its destination with our roller and caster cargo racks. No matter what size you need, we can customize a rack to fit, and last.

The versatility of our racks ensures you keep your cargo moving no matter the situation. Traveling to a small station with no deck system upon arrival? Use the heavy-duty tineways on our one-of-a-kind truck racks to remove both the rack and cargo at the same time. Need a transfer table set-up? Bolt multiple static racks together and you'll be ready to go.

With this kind of adaptability, it's never been easier to keep moving.

TRUCK RACKS

CARGO RACKS TO FIT ANY TRUCK SIZE

Roller-Bed-Type Truck ULD Pallet Low-Profile • Roller-Bed-Type Truck ULD Pallet

Minimize loading time and maximize space in your truck with unit load devices (ULDs) customized to your space.

- Tineways on the sides and ends provide maximum adaptability to any area.
- Durable, U.S. military-grade powder coating will match your brand colors and keep the racks looking new. Hot-dip galvanizing gives the option for greater durability on steel components.
- Designed to fit an existing fleet to increase capabilities and profit potential, whether it's during peak shipping season or to save money on air-ride equipped trucks.
- Optional side-load designs and connecting links ensure racks seamlessly adapt to any situation.
- Sealed roller bearings keep contaminants out for long-lasting use.
- Optional Grip Strut™ walkways increase safety.
- Custom designs accommodate any size of transfer pallets.
- Gaps between the rollers can be filled to suit industry-specific needs.

STATIC RACKS

DURABLE RACKS HANDLE CARGO WITH EASE

Cargo Rack • Inverted Caster Deck Rack

Move containers and pallets easily across durable rollers or inverted casters, and then lock into place with heavy-duty pallet stops for years of ongoing use.

- With a 15,000-pound (6,804-kilogram) cargo capacity, there's never a worry about being able to hold a load.
- Choose bulkhead or flow-through designs, or bolt units together to form a transfer table for versatile use.
- Optional adjustable legs adapt to changing needs.
- Optional Grip Strut™ walkways enhance safety.
- Pallet stops on the sides and ends accommodate a variety of configurations for both containers and pallets.
- Choosing optional hot-dip galvanizing further increases wear life.

TRUCK RACKS

WEIGHT	1,150 pounds (522 kg)
CAPACITY	15,000 pounds (6,804 kg)
MAIN FRAME	4-inch structural channel, 6-inch structural angle, tineway pockets
PALLET STOPS	Manual, spring-loaded, detented, with and without a vertical restraint
ROLLERS	2-1/2-inch diameter by 12 GA., zinc coat tubing

STATIC RACKS

WEIGHT	CARGO RACKS	1,250 pounds (567 kg)
	DECK RACKS	1,400 pounds (635 kg)
PALLET STOPS	Manual, spring-loaded, detented, with and without a vertical restraint	
CARGO RACK PALLET BED	30 rollers	
CARGO RACK ROLLERS	2-1/2-inch diameter by 12 GA., zinc coat tubing	
DECK RACK LEAD EDGE ROLLERS	3-1/2-inch diameter, 3/16-inch wall with sealed bearings and 11/16-inch hex shaft
